

Found Somebody

E^ST

Been listening to our song
(It still makes me dance and)
Been hanging at our spot
(Where we first held hands and)
Been looking out for you in all of our places
You're not looking out for me
You don't miss my company

Closer, want you closer
Is it over?
It's not over is it?
Closer, want you closer
Is it over?
It's not over is it?

I've been looking out for you
Can't find you in the usual places
You're not looking out for me

I thought, that I got you like no one else could
I was wrong, she's loving you like I thought I would
When we both go out tonight
We'll go and dance at different parties
I won't even cross your mind
I can't believe you found somebody
I can't believe you found somebody
I can't believe that it wasn't me

Don't you miss the way I looked in your jeans?
Don't you miss the way I'd interpret your dreams?
Don't you miss the way I was everything to you?

I thought, that I got you like no one else could
I was wrong, she's loving you like I thought I would
When we both go out tonight
We'll go and dance at different parties
I won't even cross your mind
I can't believe you found somebody
I can't believe you found somebody
I can't believe that it wasn't me
I can't believe you found somebody
