

Talk Deep

E^ST

Something about you makes me feel hectic
We're in your room, it's so electric
I'm really glad we left the party
I'm really glad you wanna keep talking
I don't want sleep, I wanna talk deep all night

You light a joint and we both smoke it
You make a point, I think you're joking
We're kinda close, you move in closer
Don't wanna go, think I'll stay over
I don't want sleep, I wanna talk deep all night
You're looking at me and I can't believe my eyes

Lying in your bed, we're losing track of time
You say what's in your head, I say what's on my mind
I'm already stoned, you're getting me higher
Little do you know you're setting me on fire
I don't want sleep, I wanna talk deep all night
Yeah, I don't want sleep, I wanna talk deep all night

I don't want sleep, I wanna talk deep all night
I don't want sleep, I wanna talk deep all night

Something about you makes me feel hectic
We're in your room, it's so electric
I'm really glad we left the party
I'm really glad you wanna keep talking
I don't want sleep, I wanna talk deep all night
You're looking at me and I can't believe my eyes

Lying in your bed, we're losing track of time
You say what's in your head, I say what's on my mind
I'm already stoned, you're getting me higher
Little do you know you're setting me on fire
I don't want sleep, I wanna talk deep all night
Yeah, I don't want sleep, I wanna talk deep all night

I don't want sleep, I wanna talk deep all night
I don't want sleep, I wanna talk deep all night
