

Start Over

Estelle

We changed our minds
Yes, we were right
Ooh, we had time
Your scars weren't in vain
Neither was your pain
You were the one

You said, "We gon' change it
We gon' take it
We gon' make it go"
You said, "We gon' change it
We gon' make it
We'll make love the goal"

Started over and over
And over and over
And over and over again
We started over and over
And over and over
And over and over again

I lived through so much
I got in touch
I got in touch with my soul
Beyond our skin
We were within
We channeled love as a whole

Started over and over
And over and over
And over and over again
We started over and over
And over and over
And over and over again

Ah, you said, "We gon' change it
We gon' take it
We gon' make it go"
You said, "We gon' change it
We gon' make it
We'll make love the goal"

Started over and over
And over and over
And over and over again
We started over and over
And over and over
And over and over again

Oh, you changed their mind
Yes, you were right
You had the time
Your scars weren't in vain
Neither was your pain
You were the one
