

# Melancholy Melody

Esthero

Leave me alone

I just want to lay here in my room and let myself cry

I apologize if I've disappointed you

I got lost in my darkness and the light hurts my eyes

I know you're counting on me to feed all of our families

But I just need to be on my own for a little while

'Cause I can't stop singing these melancholy melodies

So until then I'll hide

I feel tired all the time, yeah, this weight is exhausting

I cannot please everyone, least of all me

I have no more to give you, it's already been stolen

Tell me, what's left for me? A melancholy melody

I know you're counting on me to feed all of our families

But I just need to be on my own for a little while

'Cause I can't stop singing these melancholy melodies

So until then I'll hide, I'll hide

Well, you think I'm scared to write

That I've got nothing left inside

And I'm losing all my fire

But it still burns bright, just not on your command

You think I'm scared to write

That I've got nothing left inside

And I'm losing all my fire

That I'm losing all my fire

Am I losing all my fire?

Still burns bright, brighter, yeah

Leave me alone, just wanna lay here alone

In my room, let myself cry

I know you're counting on me to feed all of our families

But I just need to be on my own for a little while

So stop calling my phone, please don't come around my home

I just wanna be alone

I know you're counting on me to feed all of our families

But I just can't stop singing these melancholy melodies, yeah

I just wanna be, I just wanna be alone
