

# Gun Smoke

## Eva Under Fire

Stand and keep watch  
For the wolves, for the wolves yeah  
They've come for you  
Just to bring, just to bring you down  
Stand and stay still  
In the stillness, the stillness  
You know they've come  
To bring you down  
Take them out

Oh  
Take take take take them for what they  
Are

The warzone clears  
The fallen, the fallen  
No more pain  
No more fear  
I'm awake, I'm awake now  
The night is gone  
I see the sun  
I've never  
Felt more like someone  
I know my  
Time has come

Oh  
Take take take take them for what they  
Are

I, I, I, I  
Take aim  
They call me crazy  
Why, why, why, I  
Does gun smoke  
Never save me  
Never saves me

Come forward  
And break me down  
Forward  
Get lost somehow

Oh  
Take take take take them for what they  
Are

I, I, I, I  
Take aim  
They call me crazy  
Why, why, why, I  
Does gun smoke  
Never save me  
Never saves me
