

LIGHTHOUSE

Eva Under Fire

Kill em when the lights go out
Light em up, light em up
(Light em up, light em up)
Light em up, light em up
(Light em up, light em up)

Come and meet me down at the lighthouse
No you can't see, cause it's light's out
Riptide each night brings a new crowd
And I can't feel my fingers now

Welcome to the place that I want to take you
All your nightmares and your terrors start to come true
Now don't act like everybody's out to get you
It's just me...

Everybody's here so there's no chance of leaning
You don't have to talk I can still hear you breathing
Miles and miles in between, start grieving
And I can't stop the bleeding!

Light em up, light em up
Break em down, break em down
Light it up and
Kill em when the lights go out
Light em up, light em up
Break em down, break em down
Light it up and
Kill em when the lights go out

Come and meet me down at the lighthouse
At night, all of the monsters come out
Got a feeling that these aren't just rain clouds
And I can't feel my face now

Welcome to the place where everybody knows you
All your secrets and your fears start to cut through
Fake smiles all around start to break you
Can't you see

Everybody's here so there's no chance of leaning
You don't have to talk I can still hear you breathing
Miles and miles in between, start grieving
And I can't stop the bleeding!

Light em up, light em up
Break em down, break em down
Light it up and
Kill em when the lights go out
Light em up, light em up
Break em down, break em down
Light it up and
Kill em when the lights go out

Lights out, lights out
Up in this light house
When evil lurk round every corner

You can't fucking scream out
Chainsaw massacring is the only safe route
So you gotta light it up to make it out my light house
