

These Streets

Eva Under Fire

You tell me the same thing
Over and again
I know that you're lying
And still you pretend
I wish you could see her
The look on her face
The day that you told her
She'd been replaced
Replaced, replaced

This time
You can save yourself
If you won't listen
Why should anyone else?
This is what you want it to be
Just know they'll eat you alive on these streets

You're on to the same things
Over and again
You've switched up your story
To try and pretend

It's sickening
The game that you play with my head
I'd lie to myself to never play again!
Again, again

This time
You can save yourself
If you won't listen
Why should anyone else?
This is what you want it to be

Just know they'll eat you alive
Just know they'll eat you alive
Just know they'll eat you alive
Just know they'll eat you alive

And still I catch you
Throwing all of your pearls to swine
These streets have come for me too
You'll never take me alive

All that I am
All that you are
Is all that we have kept apart

This time
You can save yourself
If you won't listen
Why should anyone else?
This is what you want it to be

Just know they'll eat you alive
Just know they'll eat you alive
Just know, just know, just know

They'll eat you alive
They'll eat you alive
They'll eat you alive
They'll eat you alive

On these streets
