Entertainer

Evan and Jaron

so you come outside
to finally take a look
up in the sky
where the angels dream at night
I said hey that's my star your dreaming upon
girl get your own star before I wish you gone
and she said little boy what you gonna do with your life
are you gonna be a doctor
what your daddy would like
and I said that's pretty far
way down the road
I'm only seven with a second grade load
how was your date last night
oh and what was his name
did you have a good time
or was it one to shame
his name was Adam
the date went great
are you psyched for the fall
your going on grade 8
and she said little boy what you gonna do with your life
are you gonna be a doctor
what your daddy would like
and I said don't jump the gun
I've got plenty of time
but yeah I'd like to have a business
that I could call mine
so you got your masters in psychology
that sounds really cool
can you got me one for free
I'll be interning for a year or two
hows college life been treating you
and she said little boy what you gonna do with your life
you gonna be a doctor
what your daddy would like
and I said I found my happiness
hope dad approves
I'm an entertainer my sound will make you move
