

Part of Me

Evanescence

Not on your life
Won't let it break me, won't give up the fight
But on this last thread, I'm holding so tight
Feed my imaginings, don't let a sweet dream die

Not on your life
I'm not abandoning, I have survived
Somehow still standing through death and through time
I need your love like a drug keeping me alive

Drown me in your blinding light
I will be more than my survival
Own these scars on my heart
Even in dreams, I hear you calling

Breaking the surface, I won't let go
You're part of me

Can't stop me now
Just clawed my way back from deep underground
No time for hatred, no holding back now
Set me on fire, I like it, the way it burns

Hands on your heart
Who really thought we would make it this far?
What good could come of embracing the dark?
We found each other through brokenness and now look how strong
we are

Drown me in your blinding light
I will be more than my survival
Own these scars on my heart

Even in dreams, I hear you calling
So I know it's still worth believing, it's not just a feeling
As long as I don't let it go
Don't let me go

I will be more than my survival
Own these scars on my heart

Even in dreams, I hear you calling
Breaking the surface, I won't let go
You're part of me now
And always
