

Bring the Night On

EVE 6

OK I'm boring you I'm warning you tonight,
Is not the night for fights, lies white or otherwise
My mood isn't better yet Sober and humorless,
if you can't handle this, roll off the mattress
I'm trying to let you know that your not just another
When you're under the covers I'm under your thumb
And your the finest of specimens
Leaving me breathless
Reeling and restless, putting me to the test
Turn the light off Leave me where I lay
Bring the night on
Not another day
OK I'm lying when I'm telling you you're right
but you don't like the truth served straight or otherwise,
I'm an insomniac
Tossing and turning and,
getting repetitive swallow a sedative
