Out of Reach

So what now my friend Where do you go from here When will the dark days end And all the clouds clear Is it goodbye my friend I've see your fall and it's calling Got we by hidden tears That just keeps falling

Falling out of reach You can't prevent it You can't cause All wounds won't heal

So times have changed my friend Took a turn to the worst of worse Can't turn your head on fate Cause you can't unwound a curse Closed eyes won't kill thoughts Your fears the vivid dark Got wet by hidden tears that just Keeps falling

Falling out of reach You can't prevent it You can't cause All wounds won't heal Falling out of reach You can't break free from chains You can't cause all wounds won't heal no

They stretch greater and further Until there's nothing to conquer And all you do is watch then unfold

Falling out of reach You can't prevent it You can't cause All wounds won't heal Falling out of reach You can't break the chains You can't cause All wounds won't heal **Evergrey**
