

Break It Down

Everlast

Cold and lonely New York December
Girl, oh everything I remember
Everyday I got Memphis on my mind
Written cards, and I've been calling
Girl it's hard as I've been falling
A heart gets broken almost every time

Now I'm bringing me home to you baby, come home
I've been building this wall around my heart for so long
I'm bringing me home to you baby, come home
Girl you got to want to be around, you can help me break it down
Help me break it down

Old friends, like leaves, are scattered
Back where everything still mattered
Sometimes things just never go your way
Bruised and broke, but I'm surviving
All these miles that I've been driving
Got all my hopes in this old blue Chevrolet

Now I'm bringing me home to you baby, come home
I've been building this wall around my heart for so long
I'm bringing me home to you baby, come home
Girl you got to want to be around, you can help me break it down
Help me break it down
Help me break it down

Help me break it down
Help me break it down
Help me break it down
Help me break it down
Help me break it down

Now I'm bringing me home to you baby, come home
I've been building this wall around my heart for so long
I'm bringing me home to you baby, come home
Girl you got to want to be around, you can help me break it down
n

Now I'm bringing me home to you baby, come home
I've been building this wall around my heart for so long
I'm bringing me home to you baby, come home
Girl you got to want to be around, you can help me break it down
n

Help me break it down
Help me break it down
