

What Is This?

Everlast

What is this, this is Everlast
What is this, this is Everlast
What is this, this is Everlast
What is this, this is Everlast
What is this, this is Everlast
What is this, this is Everlast
Step up while I inject an overdose of intellect
An overload of my vibrations better yet a new sensation
I was lost but then he found me no corruption dissed around me
I was taken to a higher, level of funkdiffia where souls of men were burned
They were taught but did not learn about the righteous laws of God
Who threw the seeds over the side, takin' roots and tryin' to grow
Though the process might be slow please stay with my question
What is this
What is this
What is this
What is this
What is this

Not speakin' on my physical, mental or my horror
I'm speakin' on my soul for the burn would beat you whore
There's no such thing as love of your life, it's the hands of the God
So don't treat his ricious laws with blatant disregard
In order to follow the Lords path here is what you must do
Do onto each of your brothers as you have done to you
This golden rule is all you need and you'll be rewarded
The man that don't will pay the price and believe me you can't afford it
Because this is Everlast, what is this
This is Everlast
This is Everlast
This is Everlast

[illegible]

What is this,
Who is this,
Who is this,
What is this
What is this
What is this
What is this
