

## Warm Healer

### Everything Everything

We got ourselves another one  
We got ourselves another Jane Doe  
I never let the others go  
But everytime I look around they fall

See the shadow men bow down to the head of our baby, cough cough  
h  
If it isn't more then why do I feel that I'm split in half  
(Half, half, half)

Babe, don't look the other way  
I love your face and there's no more time  
Babe, I saw what you did tonight  
It's ugly but it is all I want  
Babe, they call me the medicine man  
But my own spurs don't work anymore

Don't ask for me to more kid  
I think you'll only find a grave man  
Just take a look outside the walls  
And try to tell me something that's good man

By my neck I feel some great weight the chupacabra clings on  
That's the river my big god lives it's gotta mean somethings wrong  
(Wrong, wrong, wrong)

Babe, don't look the other way  
I love your face and there's no more time  
Babe, I saw what you did tonight  
It's ugly but it is all I want  
Babe, they call me the medicine man  
But my own spurs don't work anymore
