

# Firelight

Everything Is Recorded

You remember smoke

You're scared to try  
'Cause you're scared to fly  
But just close your eyes  
And I'm by your side  
Your butterflies

I remember firelight  
I remember firelight  
I remember firelight  
And you remember smoke  
And you remember smoke

The blue butterfly  
The blue butterfly inside of me  
Which I'd always had as a kid flew out of my heart  
And something lifted and shifted  
And all of a sudden I was okay

Send me a sign  
Could you show me that you hear me when we speak at night?  
A couple people I love, and I keep them around me  
Couple people I love but I had to leave behind  
I need your help to see the light so I can lead the blind  
I smoke weed for peace of mind and to sleep at night  
And I won't sit here and say that I wish it's me that died  
But it breaks my heart to even know you'll never see me shine  
Don't worry about me, I'm fine  
I got everything but time  
Haven't seen your face since I was nine  
If I want to see your face again, I'd have to die  
And I don't wanna die  
Everybody dies  
I'm a man now  
And I look after mum and dad now  
Trials and tribulations, but I never back down  
Sometimes I feel like if you're in the sky giving handouts  
I guess I'll never know

I remember firelight  
I remember firelight  
I remember firelight  
And you remember dust

So don't be afraid  
There's no need to fear  
And just hold my hand  
And I'll keep you near your butterflies blue

We were we  
But we were you and me
