

Call Me!

Eves Karydas

It was summer, early summer
There was thunder, definitely thunder
You took my number, yeah you took my number
Now I wonder if I'll ever be the same

And I'll never let it go go go
I guess I'll never know know know

Now it's autumn, beautiful autumn
Leaves are falling, winter is calling
Could be walking, could be exploring
We could feed the birds at the local pond

Then we'll go a little bar
And have ourselves a little drink
You'll know my number by heart
Something something something something

And I'll never let it go go go
I'm never gonna know know know

Why don't you call me (why don't you call me)
You never call me (you got me waiting for you)
You could still call me (you got me waiting for you)
I want you to call me

I'll take you even if you're just bored bored
Please don't be the one who almost called called
And I know I know it's out of my control
But could I be so bold?

And I'll never let it go go go
I guess I'll never know know know

Why don't you call me (why don't you call me)
You never call me (you got me waiting for you)
You could still call me (you got me waiting for you)
I want you to call me
