

First Love

Eves Karydas

Pray, pray, let it bloom
I need, I need, I need you
I know you feel it too
Trust, trust in the mood
I need, I need, I need you
I know you feel it too

Old love hurts bad
First love dies hard

Baby, we go up
I could show you everything
Promise we'll go up
I could show you everything, babe
Baby, we go up
I could show you everything
Promise we'll go up
I could show you everything, babe

I could be better than your first love
I could be better, better than your first love
I could be better than your first love
I could be better, better than your first love

Up, up, we go up
In this light, you're half the drug
And, baby, I choose love
Eyes rise to the sun
In this light, you're half the drug
And, baby, I choose love

(And) old scars run wild
First love dies hard

Baby, we go up
I could show you everything
Promise we'll go up
I could show you everything, babe
Baby, we go up
I could show you everything
Promise we'll go up
I could show you everything, babe

I could be better than your first love
I could be better, better than your first love
I could be better than your first love
I could be better, better than your first love

Pray, pray, let it bloom
I need, I need, I need you
And I need, I need, I need
I know you feel it too

Baby, we go up
I could show you everything
Promise we'll go up
I could show you everything, babe

Baby, we go up
I could show you everything
Promise we'll go up
I could show you everything, babe

I could be better than your first love (I could be better)
I could be better, better than your first love
I could be better than your first love
I could be better, better than your first love
