

Future Memories

Evidence

These are memories from the future that I'm shooting
Outgunned and overmatched?
I'll just scratch and make a new one
Lapped the world a couple times over
I could overdo it
First to admit it that I be tripping when I've been influenced
Since we're talking, man there's been improvements
Trojans lost to Bruins
Made the music and I lost illusions
Paid the price and that's the cost of losing for the culture
I do it all across the movement
I don't have to floss a point to prove it
I'd rather be coming off like I don't know shit but really knew
it
It's funny how much less you talk when you really do it
It's 6 million ways, but I don't wanna choose it
I just wanna make the most of every minute that I'm cruising
And filter out the week of any frequency I'm tuned in
Bigger picture but I'm zoomed in
I'm in the whip through my district with the system booming

I coulda been gave up, but had the heart to do it
I got ends in my bank but spend it like I'm jewish
This a whole 'nother bracket, I'm moving' with them shooters
What I look like moving like I just can't lose it
I'm tucked off with the good kind in Massachusetts
And you don't need a punchline when your life a movie
Scoping out diamonds with my nigga Isaac
Drop a quarter million, nigga, every time
I'm certified, I come with G.I.A.
You niggas moving like the C.I.A
Fuck three million, I got a drop where the peon lay
And got a drop for every day of the week
I got spots that I don't even see
A stash spot just to park my fleet
But to be honest, I been feeling like this not enough, I workin
g double
You see it on my face, I'm going hard, I gotta make it happen
Through the ups and downs, through the high and lows
Staying on my toes until the day I'm gone
