

# HEAL (LET GO)

## Execution Day

Let go of the chokehold that is your vice  
Gamble with your demons on crooked dice  
I know its a risk that you came to take  
Sign your name in blood it's time to seal your fate

Taking that step into the great unknown  
It's a trial by fire, skin to bone  
Everything I love is all I've ever known  
We're not alone?

Falling further from the finer things  
You saved my life  
But I can't do the same  
Recollections of a brighter day  
There's nothing you can say  
I'm too far gone to change  
I never asked for this

Fire burns inside of me  
Hold a flame to everything  
You're a liar s whatcha said to me  
You'll never make these dreams reality  
You'll never know until you just let go

It's always on my mind  
Beyond the constant grind  
My life in shambles  
I'm dangling from the edge  
I've been waiting for a lifetime  
Searching for a lifeline  
To take me to the end

Taking that step into the great unknown  
It's a trial by fire, skin to bone  
Everything I love is all I've ever known  
We're not alone

Falling further from the finer things  
You saved my life  
So how can I repay  
When the poison is part of me  
There's nothing you can say  
Just accept me

This is the end  
Of all my suffering  
I can't pretend  
This isn't hard for me  
Shell of a man  
Of what I used to be  
And now I'm left with a strand of sanity

Just let go
