

Forever and Beyond Despair

Exhorder

Designs of murder ending all
Last call, then curfew comes
Take your meds and go
The gods bring on the wars
Send the troops, let 'em burn
The girls will work butter churns
All pregnant with babes

We're rolling out the bombs
Start the debate, it's on

Delivering the goods
Dad, do you think they're right?
You wouldn't waste a vote
Poles, reversed and iced
Sending bombs is a prize
Ignored commands from the board
Send it in and they're gone

We're ending all the fun
Turn the knife with the selling point
Forever and beyond
Despair

We've got to liberate the world
But not "those people" 'cause they got no oil
Sending thoughts and prayers

The decks are stacked
Be a good boy and you'll come back to debts
You're trapped
They chewed you up and spit you out

Deny oppression, start the truce
It starts here with me and you
It's not a wasted vote
If there's enough of them

We're ending the control
Before we lose it all
Forever and beyond
Despair
