

# Putrescine and Cadaverine

Exhumed

Noxious decay steals the breath from your lungs  
Nauseated by this necrotic gunge  
Fluids leak through plastic as necrovores feast  
Amino acids break down within the deceased

Decarboxylation, ornithine decays  
Regurgitation, chunks haphazardly sprayed

The stench, of cadaverine  
You retch, huffing putrescine  
In death, these compounds released  
Breathe deep

The stench, of cadaverine  
You retch, huffing putrescine  
In death, these compounds released  
Breathe deep - putrescine and cadaverine

Death warmed over smells worse than it looks  
You spew, unprepared by your anatomy books  
Nostrils besieged by cadaveric vapors  
Uncontrolled eruption earns your colleagues' disfavor

Decarboxylation, arginine breaks down  
Regurgitation, spatters your medical gown

The stench, of cadaverine  
You retch, huffing putrescine  
In death, these compounds released  
Breathe deep

The stench, of cadaverine  
You retch, huffing putrescine  
In death, these compounds released  
Breathe deep - putrescine and cadaverine

The odor ingrained  
Leaving a permanent stain  
Your mind starts to reel  
Your thoughts can no longer congeal

The stench, of cadaverine  
You retch, huffing putrescine  
In death, these compounds released  
Breathe deep

The stench, of cadaverine  
You retch, huffing putrescine  
In death, these compounds released  
Breathe deep - putrescine and cadaverine
