See you, see you later
You said cheerfully as you waved
Even though you knew that
Really, we would never meet again

Our feelings can't be expressed with words
Because it's us after all
But I understood from just looking into your eyes
Your bluff and your gentle lies

Baby don't cry cry cry
Your dim smile
Please laugh one last time just like you always did
Don't say goodbye bye bye bye
Even though we're far away
I hope I will always remember that smile of yours

No, people don't meet
Just to break up later
The number of precious memories we've shared
Are probably countless

Baby don't cry cry cry
Your amazing smile
Spending the days smiling beside no one else
Don't say goodbye bye bye bye
Every time you say "It's not goodbye"
The feelings pour out again

Cry as time marches on
If someday I forget everything
I'd like to stay just like this, the scars and pain
Embracing it all like this

I will not cry cry cry
Wiping my tears and giving a smile
From here walking towards a different tomorrow
Don't say good bye bye bye

From now on and always
Because you will always be here in my heart
