Baby, you know I love you

There are days where you can lose your way

Everybody what do you believe in?

You are living everyday

But there isn't just one thing you need

Baby, let me know

What is the most important thing you need?

I want it to hold

I want it to be next to you

You are afraid of losing things

And you may even have sleepless nights

And when you feel it, we can go far away

Just remember me and we will be fine

In this world
You can't see love with your eyes, let's hold hands
In this world
The thing I need to live, it's you
When you're crying or laughing, I will be by your side

There are days where you dream
Everybody do you believe in you?
I want it to hold
I want it to be next to you

Those times when you feel like
You can't do anything well and want to run away
And when you feel it, we can go far away
Just remember me and we will be fine

In this world
We don't know the future, but let's paint it together
In this world
The thing you need to live is my love
Even if you go down the wrong path, that's not the end, I am here

The world is testing us
Can you believe me?
Can you believe in love?
Even when you look away
I repeat "I love you" over and over

In this world
You can't see love with your eyes, let's hold hands
In this world
The thing I need to live is you
In this world
We don't know the future, but let's paint it together
In this world
Let's live on together, even if it's scary it will be alright with you
When you're crying or laughing, I will be by your side
