

# The Unseen

**Eyefear**

Can you feel a shift in time  
Are you prepared for what's to come  
Someone's let the darkness in  
And devastation has begun  
Ancient stories all tell the same  
Every generation will feel it's pain

The unseen hand that twists our fate  
Changes what might have been

Trying to find a way to rewind  
To begin again  
And make right what went wrong

Standing on the edge  
The unseen hand pushes you

We don't heed the warning signs  
You don't hear the tolling bell  
Witnessing destruction everywhere  
But never for those who do not care

Trying to find a way to rewind  
To begin again  
And make right what went wrong

Standing on the edge  
The unseen hand pushes you
