

## Black Clover

### Eyes Wide Open

When we face the final dagger  
We evolve  
And the old will be destroyed  
You call yourself a gravedigger man  
But you are just shovelling dirt

No rest for the wicked you know  
Until we close our eyes at the end of the show

Reroute  
Find a way to meet at the end  
Don't follow your inner hollow  
And leave the path unchained

Take the Lead to the future I need  
Black clover  
Shows me fortune and greed  
You say you elevate yourself  
But I can't see shit from up here

No rest for the wicked you know  
Until we close our eyes at the end of the show

Reroute  
Find a way to meet at the end  
Don't follow your inner hollow  
And leave the path unchained  
You're not in this alone  
Rooted from this black hole

Bury all your seeds of anger  
Bite your tongue and pull the trigger

Reroute  
Find a way to meet at the end  
Don't follow your inner hollow  
And leave the path unchained  
You're not in this alone  
Rooted from this black hole

I wake up in the morning  
To a world that doesn't care  
Will I be remembered  
Or will I fade?  
This cold and dark existence  
Leaves a mark upon my grave  
Will I be remembered  
Or will I fade away?  
I won't fade away
