

It's like a disease
A fucking parasite
That's colonizing from brain to spine
They live between those narrow minds
Self preservation is my new intention

Release myself from exploitation
Free this impulse in rotation
No more accomodation
This is fucking over

They taught me to behave
To stay in my place
A girl that once loved is now full of hate
Stuck in society they don't respect me

False sympathy just to fuck me over
I will no longer take any order
Your ego's bigger than any other
All ya did was make me angrier
Don't you dare think that you are any
Better

You miserable fuck
Your face begs to get fucking punched
Suck it
There's nothing left here but suffering
You ain't shit without your fucking hold on me

Dominant, dominated
A shift in power long awaited
Aggravate, aggravated
This is over
