

# Paralytic Flow

## Failure

The pilot exhales  
The meter coughs  
The results limp in  
With paralytic shock  
It's a painful caseload  
A hull to hose  
We will burn from now on  
Forever in control

And I want you so bad  
I forget myself  
I'm a radiator  
I'm an empty shelf  
And I want you so bad  
And it leaves me cold  
I'm a spinal fracture  
But I'm in control

The evening exhales  
The neighbor coughs  
The sky is running  
Away with my thoughts  
The feelings coming closer  
What I don't want to know  
The heaven's at my mind in a paralytic flow

Which one recovers  
Which one gets free  
What did you discover on the way to me

And I want you so bad  
I forget myself  
I'm a radiator  
I'm an empty shelf  
And I want you so bad  
And it leaves me cold  
I'm a spinal fracture  
But I'm in control

Your sociopath shell won't save you now  
Your calm collector he gonna pull you down  
Your metal detector won't bail you out

Which one recovers  
Which one gets free  
What did you discover on the way to me  
...
