

The Way You Want It

Fair Warning

The dream of love - it fades away
And now i greet the silence as a friend -
Too many words - and all they say
We're standing at the crossroads where it ends -
But still i feel the fire - that burns my soul
I guess it's just a feeling - i can't control
If this is love - the way you want it
Take it all, make it live and let it shine -
If these are dreams - the way you need them
Find a better love for all the tears you cry
The leaves of fall - they're dry and worn
And now we see them
Drifting with the wind -
No looking back - we're moving on
And soon we won't remember where
We've been
But still i feel the fire - that burns inside
I guess it's just rejection - to live a lie
If this is love - the way you want it
Take it all, make it live and let it shine -
If these are dreams - the way you need them
Find a better love for all the tears you cry
Ooh, no find your love
If this is love - the way you want it
Take it all, make it live and let it shine -
If these are dreams - the way you need them
Find a better love for all the tears you cry
That you cry -
That you cry, babe
