

Kill The Silence

Fairweather

Transmit this message, break the stall
Turn it on and kill this radio silence
We're broadcasting out
Discard the routine, take it over
Turn it on and fill this frequency
Fill these frequencies

Station headlines and open lights
We know the sounds repeating
Signals, voices lost
Forgotten ghosts seem to haunt distant spaces

Transmit this message, break the stall
Turn it on and kill this radio silence
We're broadcasting out
Discard the routine, take it over
Turn it on and fill this frequency
Fill these frequencies

Attenuated tones and words then
Must be something that we know
There's something that's been left behind
Signals, voices lost
They're calling out
And rising up to be a gaining focus

Static cycles, empty channels fade away...
Just fill the frequency so
Static cycles, empty channels fade away

You can't turn it down
Send it out
Kill the silence, take it over
You can't turn it down
Send it out
Coming out to kill the silence, take it over

Transmit this message, break the stall
Turn it on and kill this radio silence
We're broadcasting out
Discard the routine, take it over
Turn it on and fill this frequency
Fill these frequencies
