

Heaven Only Knows

Faith Evans

Who knows what tomorrow brings
And heaven only knows what's on the other side of the rainbow
All I know is what the seasons bring
And even with the seasons come uncertainty

Who knows
Do you know
I don't know
Heaven only knows what the future holds
Heaven only knows what's over the rainbow
Just imagine all the possibilities
Heaven only knows what the future holds

God gave me a conscious heart
And my responsibility is to teach my people
Tryin to make them understand
Your will, your perfect plan

If we come together we can change it
Take it one day at a time
Live your life and you'll be find

We can't live for tomorrow
So make the best out of today
We gotta keep the faith
If we just keep that faith through the night
We'll be alright

If we come together we can change it
Take it one day at a time
Live your life and you'll be find
Can you imagine all the possibilities
