

Gravity

Falling in Reverse

Gravity
(Promise me you'll stay strong)
And carry on
Carry on

I'm here to say goodbye
A spell, a prayer, you try
To bring me back to life
(Don't follow me, follow me)
So look me in my eyes
Sing me lullabies
Hold me til it's time
(Don't follow me, follow me)

Gravity don't mean that much to me
Now I'm falling near the atmosphere
No shackles on my feet
And I know I may be already gone
Just promise you'll stay strong
And carry on
Carry on

I don't miss the way it hurts
A blessing? It's a curse
We're better off or worse?
(Don't follow me, follow me)
Like a child, I have learned
Everybody waits their turn
Like a phoenix, I will burn
(Don't follow me, follow me)

Oh, this is it, I can feel my breath slowing
And my heart is beating weaker from the pain I'm not knowing
So kiss another face and wipe the tears from your eyes
'Cause this is goodbye
(Don't follow me, follow me)

Gravity don't mean that much to me
Now I'm falling near the atmosphere
No shackles on my feet
And I know I may be already gone
Just promise you'll stay strong
And carry on
Carry on

Who we are is determined by the scars
Death is like a one way ticket to a distant star
All we are is a cosmic dust that scatters free
With no sense of direction, we're just wandering
Who we are is determined by the scars (We're wandering)
Death is like a one way ticket to a distant star (We're wandering)
All we are is a cosmic dust that scatters free
With no sense of direction, we're just wandering
(We're just wandering)

Gravity don't mean that much to me
Now I'm falling near the atmosphere

No shackles on my feet
And I know I may be already gone
Just promise you'll stay strong
And carry on

Gravity (We're wandering)
Gravity (We're wandering)
We're wandering
We're just, we're just, we're just wandering
Who we are is determined by the scars (We're wandering)
Death is like a one way ticket to a distant star (We're wandering)
All we are is a cosmic dust that scatters free
With no sense of direction, we're just wandering
(We're just wandering)
