

The Departure [2017]

Falling in Reverse

Pray for me my friend
I have reached the end
Heaven, well, is a fairy tale
So I will now descend

And it's all the same, I was wrong, you were right
And when I was born all the angels cried
I spend every night in a waking dream
While the devil sings to me
Somebody set me free

Oh my god what have I done?
Who's this person I've become?
And it's all the same and it makes no sense
And I walk this line and I'm on the fence
Between right and wrong, it's the same old thing
Round and around I go
Somebody set me free

Today I say goodbye
I've got to leave you all behind
Heaven's hell to wish me well
Cause I must now descend

And it's all the same, I was wrong, you were right
And when I was born all the angels cried
I spend every night in a waking dream
While the devil sings to me
Somebody set me free

Oh my god what have I done?
Who's this person I've become?
And it's all the same and it makes no sense
And I walk this line and I'm on the fence
Between right and wrong, it's the same old thing
Round and around I go
Somebody set me free

Somebody set me free

Oh my god what have I done?
Who's this person I've become?
And it's all the same and it makes no sense
And I walk this line and I'm on the fence
Between right and wrong, it's the same old thing
Round and around I go
Somebody set me free

And it's all the same and it makes no sense
And I walk this line and I'm on the fence
(Somebody set me free)
Between right and wrong, it's the same old thing
Round and around I go
(Somebody set me free)
