

Where Have You Been

Falling in Reverse

Whoa, Where have you been?
My life's not the same without you in it

My love, I've watched you disappear
right before my eyes,
right before I told you how I feel.
No, I must thank you now
for the things you've done.
You helped me fight my demons
like a mother to her son.
Just solder (?)

Whoa, where have you been?
My life's not the same without you in it
Whoa, forever I'll wait
Your love and affection is all that I crave

I long for your kiss and your memory still remains

My heavy heart you carried on your back
and right before your eyes,
I stood back up and picked up all the slack.
My love, I have done my best
to hold my head up high
I'll never be the same without you in my life

Whoa, where have you been?
My life's not the same without you in it
Whoa, forever I'll wait
Your love and affection is all that I crave

I long for your kiss and your memory still remains

* guitar solo *

Blood in blood out

Whoa, where have you been?
My life's not the same without you in it
Whoa, forever I'll wait
Your love and affection is all that I crave
(2x)

I long for your kiss and your memory still remains (2x)
