### Falling Up

I set it all on fire, it burned away in the night  
Watching with eyes so tired, the orange and the blue arise  
Then I sped off on a motorcycle, like everything you dreamed  
I'll create a universe that you can barely see

Inside or outside corner in the night  
The coroner hides underneath the stairway  
Where the birds spin sticks in the corridors  
Don't tell the others  
The cider house side corner in the night  
It's poison, they are boarding up the windows  
One down and they it's going to slip  
So don't tell the others

Above my head, they'll fly  
With their lives that are more than mine  
Lift up my hands to light  
And feel life that is more

I built a wooden backdrop  
I made it look awfully real  
I set it up in the wood shop and lit it electric teal  
Then coughed up just a little blood  
It splashed into my hand  
Please run and get father now  
Because I'm thinking this is bad...

Inside or outside corner in the night  
The coroner hides underneath the stairway  
Where the birds spin sticks in the corridors  
Don't tell the others  
The cider house side corner in the night  
It's poison, they are boarding up the windows  
One down and they it's going to slip  
So don't tell the others
