

Dance in the Desert

Fallstar

I strike back and rage into the dying of the light
Without an afterlife, I found heaven on the inside
We're at war with the cycles
We're at war with fear inside of us

I'm heading to the place where I see lights in the sky
Silence, I stand in wonder
I found freedom in your hands
Stare and wonder as the universe aligns before me

Every good I know is connected to the spark inside of us
We gotta get it back
Every good I know is connected to the spark inside of us
We gotta get it back

Feel it in my bones, I've got fire shut up in mine
Feel it in my bones, I've got fire shut up in my bones

I strike back and rage into the dying of the light
Without an afterlife, I found heaven on the inside
We're at war with the cycles
We're at war with fear inside of us

We walk across the ocean of fire to dance with the animals

When you've heard your name a thousand times
Stare and wonder as the universe aligns before me

Feel it in my bones, I've got fire shut up in mine
Feel it in my bones, I've got fire shut up in my bones

Every good I know is connected to the spark inside of us
We gotta get it back
Every good I know is connected to the spark inside of us
We gotta get it back

When you've heard your name a thousand times
They say that you wake up
If I set ten thousand mirrors a little light should be enough

When you've heard your name a thousand times
They say that you wake up
If I set ten thousand mirrors a little light should be enough

Stare and wonder as the universe aligns before me
Stare and wonder as the universe aligns before me
