

# Divine Spark

Fallstar

[Verse 1]

Deeper than I've ever gone, farther than I know  
There's a goodness that surpasses all the wicked in the world  
So can I ask you now  
Did you believe in me, swimming in the tidal wave  
I thought I lost my mind  
But I could hear you in my ear so clearly

[Chorus]

Oh my God  
I've found something to die for  
All my life I've waited for an answer

[Verse 2]

I don't believe that heaven's out there somewhere in the clouds  
Cause I hear a voice keep telling me he brought it to the ground  
So can I ask you now  
Did you believe in us, even while you were here on Earth  
Could greater things be done  
Could greater things be done in us

If there is divine spark in us, won't you help us to release and burn  
(Burn) (burn) The spark inside of us  
Burn (burn) (burn)  
The spark inside us all  
All creation reconciled, as above so below  
All creation reconciled, as above so below

[Chorus]

Oh my God  
I've found something to die for  
All my life I've waited for an answer

Oh my God  
I've found something to die for  
All my life I've waited for an answer

[Bridge]

My people, are you with me, where you at  
In the front, in the back  
We got lights on our heads  
My people, are you with me, where you at  
In the front, in the back  
We got lights on our heads  
Making noise, making noise

My people, are you with me, where you at  
In the front, in the back  
We got lights on our heads  
My people, are you with me, where you at  
In the front, in the back  
We got lights on our heads  
Making noise yeah I'm on fire

Won't you help us to release and burn (burn) (burn)  
The spark inside of us  
The spark inside us all

Who was it that said it would all end in flames  
Who was it that said this truly our fate  
Who was it that said it would all end in flames  
Who was it that said this truly our fate

[Chorus]

Oh my God  
I've found something to die for  
All my life I've waited for an answer

Oh my God  
I've found something to die for (Who was it that said it would all end in flames)  
All my life I've waited for an answer (Who was it that said this truly our fate)
