

## Eden's Lament

Fallujah

Sacred new world deconsecrated  
Human compulsion to devolve into chaos  
Far from where we originated  
The true descendants of defilers of our home

Novel malignancy  
Of tranquility  
Disrupted beyond repair by our arrival

Unstable ground  
Starts to break down  
Tainting this paradise we've found

Ancient human invasion brought us here

No escaping the damage done  
A hallowed space, overrun

Utopia ravaged by our influence  
Bring it all to an end  
Forcing the death of all innocence

No escaping the damage done

Unstable ground  
Starts to break down  
Tainting this paradise we've found  
New blood raining down  
Staining this paradise we've found
