## **Don't Die with Your Dreams**

You wanted to travel the world And speak five languages Maybe a couple of kids And play the piano in Paris You wanted to taste everything See Kyoto in the spring Breathe in the cold mountain air So what are you doing here?

Come back to life again I'm not ready to lose you friend Darling, come back to life again Don't die with your dreams

You wanted to split into thirds And move your own sweet ways No matter what anyone says I know your heart is the same When did it take such a turn? Your dreams just slipped away You said you would never let go And that's a promise you made

Come back to life again I'm not ready to lose you friend Darling, come back to life again Don't die with your dreams Don't die with you dreams

Don't let your dreams die inside of you Just give them water and let them bloom Life's a bitch but like your mother You get the one Don't let the bother bother you too much Darling, please stay out of touch with reality Go and live your dreams

Come back to life again I'm not ready to lose you friend Darling, come back to life again Don't die with your dreams

Come back to life again I'm not ready to lose you friend Darling, come back to life again Don't die with your dreams Don't die with your dreams

Don't die with your dreams
