

## Desire (The Moon)

Fame On Fire

Cut ties with everyone  
'Cause I'm a disease  
I wanna suffer in silence  
Come and go as you please  
'Cause I've seen this before  
And I'm numb to it all  
And I don't know who I am

Dancing with desire  
Lucid and dreaming in the night sky  
Lost in illusion  
I'm fading out fading out fading out  
I fear my light is dimming out dimming out  
On me

The truth is that I wanna change  
I may not make it another day unless I escape  
From the places my mind likes to go to first  
Thought I got through but I'm fucking cursed  
I'm in my own way

Dancing with desire  
Lucid and dreaming in the night sky  
Lost in illusion  
I'm fading out fading out fading out  
I fear my light is dimming out dimming out  
On me

Cut ties with everyone  
'Cause I'm a disease  
I wanna suffer in silence  
Come and go as you please

Just leave

Dancing with desire  
Lucid and dreaming in the night sky  
Lost in illusion  
I'm fading out fading out fading out  
I fear my light is dimming out dimming out  
On me

Dancing with desire  
Lucid and dreaming in the night sky  
Lost in illusion  
I'm fading out fading out fading out  
I fear my light is dimming out dimming out  
On me

Dancing with desire
