

## For You

## Fame On Fire

Hey now baby  
Where could you have gone?  
I'm looking in places  
But I keep guessing wrong  
Is this paradise is it burning down  
I made you promise  
I can't give up now

Take me back when we had it all  
And I won't let you fall

With every little thing I do  
I do it all just for you  
In a future designed for two  
But I'm doing it all for you  
For you for you

Hey now baby  
You had me on my knees  
Begging you to stay  
Even though you had to leave  
I'm sitting here in silence  
With echoes of our past  
Pillow talk, honest words  
Designing us to last

Take me back when we had it all  
And I won't let you fall

With every little thing I do  
I do it all just for you  
In a future designed for two  
But I'm doing it all for you  
For you for you

I don't want move on  
I'm trying to stay strong  
But when the time is right  
I want you in my life  
There's too much weight me  
Remember how to be  
Happy with myself, so baby now can't see  
I want you to want me

With every little thing I do  
I do it all just for you  
In a future designed for two  
But I'm doing it all for you  
For you for you

With every little thing I do  
I do it all just for you  
In a future designed for two  
But I'm doing it all for you  
For you for you

I'm doing it for you

Oh Oh  
I'm doing it for you  
Oh Oh  
I'm doing it for you  
Oh Oh  
I'm doing it for you  
I'm doing it for you
