

Over It

Fame On Fire

Every word you ever said
You were never honest
You manipulate the truth
Couldn't keep a promise

You kept dragging yourself down
But you didn't know
I keep telling myself that
I've let you go

I got nothing left to lose
So go and make your move
I swear I'm over it
You have nothing left to prove
There's nothing you can do
I swear I'm over it

You thought that I would never make it this far
Held a grudge and doubted me from the start
Made it feel like I was nothing, but
Now it's over
You're unaware of all the damage you've done
Held me down and left me nowhere to run
Sick and tired of the games you play
'Cause now it's over

You kept dragging yourself down
But you didn't know
I keep telling myself that
I've let you go

I got nothing left to lose
So go and make your move
I swear I'm over it
You have nothing left to prove
There's nothing you can do
I swear I'm over it

I can hear your voice, it haunts me
You can't take it back, it's too late
Made me feel like I was nothing
You are all the same

I got nothing left to lose
So go and make your move
I swear I'm over it
You have nothing left to prove
There's nothing you can do
I swear I'm over it
