

Head-shake, talk no, tongue hold, tongue hold
Winter, sent her, unfold, unfold
When I usher new soul, new soul
Went on to show a home, a home

You look down all around, baba
You took down all the sound, baba
We hear to help you survive, baba
Brother now holds the crown, baba

You look down even with us all around
Just because it didn't fit
You look down even with us all around
Just because it didn't fit
You look down even with us all around
Just because it didn't fit
You look down even with us all around
Just because it didn't fit

I'd still hold her too close
I'd still take her too old
When I usher new soul, new soul
Went on to show a home, a home

You look down all around, baba
You took all the sound, baba
We hear to help you survive, baba
Brother now, the hall, the crown, baba

You look down even with us all around
Just because it didn't fit
You look down even with us all around
Just because it didn't fit
You look down even with us all around
Just because it didn't fit
You look down even with us all around
Just because it didn't fit
