

Fuck The Robots

Far East Movement

Sit down, shut the fuck up
All my live motherfuckers get your hands up
Just say you, just say you
Just say we don't wanna hear it no more
Sit down, shut the fuck up
All my live motherfuckers get your hands up
Just say you, just say you
Just say we don't wanna hear it no more

Attention, time for action
Fuck the robots if they people bashing
Seen them take a hit with the chain reaction
Oh my God, three Asian kids rapping?
Live and direct with the culture shock
I'ma transform mines like an autobot
Stand there, far away, 'cause I made the rock
Don't twist my arm 'cause it's made to pop
And embrace the terminator jack in my pants
I say fuck the dollar bill, suck and take it away
Throw Watts at the meter, man, jacking for change
Fuck the robots 'cause they all look the same

Sit down, shut the fuck up
All my live motherfuckers get your hands up
Just say you, just say you
Just say we don't wanna hear it no more
Sit down, shut the fuck up
All my live motherfuckers get your hands up
Just say you, just say you
Just say we don't wanna hear it no more

Streetlights is out, can't see my city
Knee deep in hate, strong armed and ready
Liquor stores lit up, little kids lit up
Knocking on your doors for years and now we fed up
Fuck the law, for years they suppress
Ready to a car bomb strapped to my chest
It's a true makeover, ready to call the silence
We the raw meat in the jungle full of lions
Sparks fly like the fourth of July
It's all been a lie, so we had a 4-29
The smoke is so thick I couldn't see ahead of me
Wonder why we're fighting with the wrong enemy
And beat the trash if you've had enough
We do this for the love, three fingers up
Never seen, never heard, keep your face high
Get off your asses the movement ain't televised

Sit down, shut the fuck up
All my live motherfuckers get your hands up
Just say you, just say you
Just say we don't wanna hear it no more
Sit down, shut the fuck up
All my live motherfuckers get your hands up
Just say you, just say you
Just say we don't wanna hear it no more

There's a war going on where you least expect it
Inside the mind, the robots infested
Be yourself, let your true colors shine
We don't need clones, so pick your own life
Yeah, locked and loaded I'm ready for battle
If you ain't take the lead then follow my shadow
Take the saddle straight from the horse's lips
I've seen this shit, I ain't just reporting it
Ain't nothing changed but the face and the names
So ain't no escape in this race that I claim
Stand up for your people, we placing the blame
On the motherfucking robots, they all look the same
And beat the trash if you've had enough
We do this for the love, three fingers up
Never seen, never heard, keep your face high
Get off your asses the movement ain't televised

Sit down, shut the fuck up
All my live motherfuckers get your hands up
Just say you, just say you
Just say we don't wanna hear it no more
Sit down, shut the fuck up
All my live motherfuckers get your hands up
Just say you, just say you
Just say we don't wanna hear it no more
