

Stars

Farmer Boys

Every age needs different men
Every fight a happy end
Every flower needs a bee
Some birds prefer a certain tree

Wrong directions that we take
Wild corrections and no break
You want the change, you want it now
This is your chance

It's never too late to turn around
To follow Your heart
Just let it go, it's up to you
You hold the stars, the stars in your hands

It's never too late let's start right here
The look in your eyes, the blood and tears
You're holding the stars
The stars, the stars in your hands

Every hamster loves its wheel
Every soldier shout and drill
Murderers to shoot and kill
Some wants to save, others heal

Bad decisions that we made
Poor revisions, anyway!
False illusions, the right conclusion:
This is your time

It's never too late to turn around
To follow Your heart
Just let it go, it's up to you
You hold the stars, the stars in your hands

It's never too late let's start right here
The look in your eyes, the blood and tears
You're holding the stars
The stars, the stars in your hands

It's never too late to turn around
To follow Your heart
Just let it go, it's up to you
You hold the stars, the stars in your hands

It's never too late to turn around
To follow Your heart
Just let it go, it's up to you
We hold the stars, the stars in your hands

It's all we have

The stars in your hands...

It's never too late to turn around
To follow Your heart
Just let it go, it's up to you

We hold the stars, the stars in your hands

It's never too late let's start right here
The look in your eyes, the blood and tears
You're holding the stars
The stars, the stars in your hands
