

I'm In Love With Everything

Faron Young

Every day would use a new day thanks to you there's not a blue day
Then she and love came my way my everything's been you
And I'll never try to change it no I wouldn't rearrange it
'Cause I'm in love with everything and my everything's been you

If you could look through my eyes you'd see why you're everything to me
You're always good and always true you're guiding light in everything I do
And if I can't help but show it you can't help but know it
I'm in love with everything and my everything is you

If you could look through my eyes you'd see why you're everything to me
You're always good and always true you're guiding light in everything I do
And if you can hear a bell ring and you can hear my heart sing
'Cause I'm in love with everything and my everything is you
'Cause I'm in love with everything and my everything is you
