

Hummingbird

Fastball

What's the word Hummingbird?
What's those voices that you've heard?
Spend your days running round
It just brings you down
It just brings you down

You've seen the Taj Mahal at night
And you've seen the Emerald Isle
You've seen the Valley of the Kings and Queens
And you've sailed down the Nile

You've seen everything you can see
Still it doesn't make you happy

What's the word Hummingbird?
What's those voices that you've heard?
Spend your days running round
It just brings you down
It just brings you down

You've had breakfast with the Dalai Lama
And you've met heads of state
You're surrounded by those parasites
Who tell you that you're great
You've met everybody, it's true
Someone should introduce you to you

What's the word Hummingbird?
Has the scene around you blurred?
You can run, you can't hide
From the simple truth inside
The simple truth inside

You've met everybody, it's true
Someone should introduce you to you

What's the word Hummingbird?
You've been shaken you've been stirred
Are you afraid of what you'll find
If you sit still with your mind
Sit still with your mind
