If I trip and fall it's 'cause my boots untied
When the roof caves in find somewhere to hide
When the clock strikes twelve then we come alive
Can you carve your name in my back tonight?

When the lights go out, grab my hand and follow me
And we'll drive all night while the city sleeps
Face down on the ground while my cotton splits
Take my heart, take my mind, take everything

If I trip and fall it's 'cause my boots untied
When the roof caves in, find somewhere to hide
When the clock strikes twelve, then we come alive
Can you carve your name in my back tonight?

(My life's on trial, can't stop falling)
(My life's on trial, can't stop falling)
My life's on trial, can't stop falling
Bide some time, devil's calling
My life's on trial, can't stop falling
Bide some time, devil's calling

When the lights go out, grab my hand and follow me
And we'll drive all night while the city sleeps
Face down on the ground while my cotton splits
Take my heart, take my mind, take everything

If I trip and fall it's 'cause my boots untied
