

# City Glitter

Fazerdaze

The city's gone to sleep now  
I'm driving through the streets now  
The city glitters in the dark  
The city glitters in the dark

Your house fading to the background  
When we thought we had it planned out  
Now as I turn into the dark  
The city glitters where you are

Will I look back to see  
You waiting there for me  
You waiting there for me, yeah  
But like a fading dream  
You're further than I reach  
You're further than I reach, yeah

I let you go with each passing night  
I let you go with each passing night  
I let you go with each passing night  
I let you go with each passing night

Days turn into weeks now  
But we're getting back our sleep now  
You're moving on I'm moving south  
Through friends I'm asking how you are

But we move deeper in the years now  
You've met her I finally breathe out  
And as we're through the hardest part  
The city glitter seems so far

Still I look back to see  
You waiting there for me  
You waiting there for me, yeah  
But like a fading dream  
You're further than I reach  
You're further than I reach, yeah

I let you go with each passing night  
I look back to see (I let you go with each passing night)  
You waiting there for me (I let you go with each passing night)  
You waiting there for me, yeah (I let you go with each passing night)  
But like a fading dream (I let you go with each passing night)  
You're further than I reach (I let you go with each passing night)  
You're further than I reach, yeah (I let you go with each passing night)
