

In Blue

Fazerdaze

We're talking every night
Your body needs it slow
We stay the week at mine
You're learning to be close again

Cause all those years we went unseen
And tangled in the blue
I caught my breath and found some air
The same time so did you

(But it comes right with you)
Right place right time
(I'll take the time for you)
Just take your time
(I think you know how to)
Love me just right
(Cause it comes right with you)
Just take your time

We talk away the days
They go fast and slow
You're one ocean away now
I hold you on the phone

Cause all those years I disappeared
And lost myself in blue
Caught my breath and found the surface
Up there I met you

(But it comes right with you)
Right place right time
(I'll take the time for you)
Just take your time
(I think you know how to)
Love me just right
(Cause it comes right with you)
Just take your time

Right place, right time
Just take your time
Right place, right time
Just take your time

Right place, right time
Just take your time
Right place, right time
Just take your time

Cause all those years I disappeared
And lost myself in blue
Caught my breath and found the surface
Up there I met you

Cause all those years I disappeared
And lost myself in blue
Caught my breath and found the surface
Up there I met you
