

## Overthink It

Fazerdaze

I fell off the ground, didn't want to make a sound  
Yes, I'm all shook out, it took you too long to figure out  
Why do you stoop so low? Do you think I overthink it  
Yeah, I guess it shows, yeah just count it out  
Nothing matters but remember every second counts

Focus on your breath and just try to clear your head  
Filter out what they said and dispose of all the dregs  
I've got none, nothing left, could you save it for my death bed  
Yeah, I'm not that impressed, you're just trying to get ahead

Yeah, I get emotional, did you think all this wouldn't have taken its toll  
Yeah, dim the lights real low, as I whisper all my secrets through a microphone  
What do you want to achieve, do you want to leave now you think you're too good for me  
Watch out it's a slippery path  
Once you walk it there is never any going back

Focus on your breath and just try to clear your head  
Filter out all the voices and dispose of all the dregs  
I've got none nothing left, could you save it for my death bed  
Yeah, I'm not that impressed, you just try to get ahead

It's over, uh yeah, I know it, uh yeah  
Come over, I think I've been overthinking it  
It's over I know it, we're getting older it's only just now unfolding  
Come over, here's hoping  
I'm overthinking it

It's the type of year where I'm on the brink of tears  
Tryna keep it together but I'm crumbling under pressure  
What a blur, is this life as we see the levels rise  
Watch the ground disappear and we're acting out of fear  
Well, you focus on your breath and you try to clear your head  
Filter out all the voices and dispose of all the dregs  
I've got none, nothing left except the beating in my chest  
Feel it all decompress, feel it, feel it, I feel it
